

Azur 540C and 640C compact disc players

Cambridge Audio's Azur range grows with the addition of two stunning models.

These multi-award winning CD players employ the latest generation DACs (digital to analogue converters), proprietary data re-clocking which reduces jitter to a minimum, a specially designed Cambridge Audio servo solution and premium Sony laser optics.

A custom designed, acoustically damped chassis minimises resonance, ensuring ultimate sonic performance. Technological prowess doesn't detract from the models' sleek looks. The robust aluminium-fronted casework gives the 540C and 640C an elegant appearance designed for longevity and both models feature full function aluminium faced Azur remote controls.

Specifications	Azur 540C	Azur 640C
Frequency Response:	10Hz to 20KHz +/- 1dB	10Hz to 20KHz +/- 1dB
THD:	0.003%	0.002%
D/A Conversion:	24-bit/192kHz	24-bit/192kHz
Dynamic Range:	> 95dB	> 100dB
Channel Separation:	> 80dB	> 90dB
Correlated Jitter:	< 260ps	< 260ps
Digital Outputs:	Optical and Coaxial	Optical and Coaxial
Max. Power Consumption:	17 Watts	17 Watts
Dimensions (W x D x H) (mm):	430 x 310 x 70	430 x 310 x 70
Weight:	4.6 kg/10.1 lbs	4.6 kg/10.1 lbs
