

CAMBRIDGE AUDIO 540D

>£230 A STYLISH DVD PLAYER WITH LOTS TO OFFER

>Cambridge Audio 020 7940 2240 >www.cambridgeaudio.com

Paying £230 for something you can pick up for less than a ton while doing your weekly shop may seem a touch mad, but if you care a jot about sound and picture quality, you'll be interested in this DVD player from Cambridge Audio's Azur range. All the important tech features are on-board, including PAL and NTSC progressive scan, while the build and styling are a million miles away from your average supermarket special. But it's the performance that wins you over, and with the inclusion of DVD-Audio, this is a class act. The sound quality is never less than impressive, while the

images the 540D produces are detailed and realistic. It really does the lot; the only thing that seems to have been forgotten is the "e" in azure. Apart from that, the attention to detail is impeccable. **Shaun Marin**

T3 VERDICT

PERFORMANCE
VALUE
OVERALL

Top build and styling are equalled by superb performance. Great if you're looking for a DVD player that can play CDs with aplomb.
