

Drupal Developer | Remote

At Cambridge Audio, we want you to hear your music at it's very best, as the artist intended it to be heard, with nothing added, nothing taken away. That's what we've always wanted because that's what music lovers like us deserve. It's why we're constantly experimenting, solving problems and creating new kit. It's why we've been doing what we do for the last 50 years. It's why we're always trying to make the listening experience better. Pure. However, you listen, whatever your budget, our goal is simple: Give you the best possible sound, at the fairest possible price.

We're looking for a personable, outstanding Drupal Developer to work in a small, talented team to help create, enhance and maintain multiple web sites for our expanding business.

We're a business full of great people who are encouraged to develop their careers and push their own creativity and progression. To find out more about us, visit:

www.cambridgeaudio.com/about-us

What we are looking for:

We are looking for someone who can tackle interesting challenges for a diverse range of projects, ranging from working on custom Drupal Commerce integrations and implementations to creating custom unique front-end experiences while delivering quality and robust solutions using open-source web technology.

You must be able to effectively devise and communicate ideas and solutions, both with our team and our partners, where you would demonstrate passion for delivering great user experiences.

This position is fully remote however at sometimes it would be great if it would be possible to meet for face-to-face meetings within the UK. However, worldwide candidates are also being considered especially based in EU and / or USA.

What you must have:

- At least 4 years' experience as a Drupal Developer
- Expert knowledge of writing custom Drupal 8/9 themes and modules
- A deep passion to dig deeper
- Good working knowledge of HTML, SASS, JavaScript (including jQuery)
- Ability to convert comprehensive layout and wireframes into working HTML pages.
- A good understanding of modern web workflow including using version control systems (e.g. git) and node-based toolchains (e.g. gulp)

What we would love you to have:

- Previous exposure to the UX and design process
- Experience with REST, SOAP and JSON
- Experience of working with 3rd party APIs integrations

Personal profile:

- Organised, ability to plan effectively and juggle priorities in a calm manner
- Self-motivated, proactive and confident
- Ability to understand detailed technical information and simplify complexity

What we offer:

- Salary: Negotiable, Dependent on Experience and Ability.
- 4pm finish Fridays on the last Friday of every month!
- 50% off gigs and festivals
- Regular socials organised by our Director of Fun
- A range of wellness benefits

To apply please email your CV to drupal@cambridgeaudio.com or by going to www.cambridgeaudio.com/careers . All applications will be treated in the strictest confidence.

“Cold calling” emails from Recruitment Agencies will be rejected.
