

Industrial Designer | Remote

At Cambridge Audio we love music, and our mission is simple: Design and engineer audio gear that makes your favourite songs sound amazing. That's it.

Our engineering department encompasses many disciplines; industrial design, electronics, embedded software and mobile application development are all carried out by dedicated team of music lovers on a mission to produce audio equipment that faithfully creates a pure and natural sound. Nothing added, nothing taken away.

We're looking for an industrial designer to join our headphone team to develop innovative and great sounding audio products.

As an active member of the team you will work with electronic, audio and design engineers and have opportunity to influence and take ownership for key product decisions.

You will have experience of design concept workflows, materials and processes commonly used in the consumer electronics industry and an appreciation of product development lifecycle.

We're a business full of great people who are encouraged to develop their careers and push their own creativity and progression. To find out more about us, visit: www.cambridgeaudio.com/about-us

Responsibilities:

- Design and develop all new headphone related products
- You will be the sole industrial designer on headphone projects, but will have support and guidance from the company's senior industrial designer.
- Conduct initial research stages for each brief
- Produce concept designs to fit a given brief
- Produce high quality presentations of designs and present to key stakeholders
- Develop chosen concepts ready to handover to our manufacturing partners in Asia
- Manage, assist and review the development of the mechanical design
- Project manage all headphone projects in relation to Industrial Design and Mechanical design
- Review products and samples at all manufacturing stages and produce product sample reports
- Creation and upkeep of CMF documentation.

Skills required:

- Strong portfolio showing your design process and commercially viable products
- A good understanding of human centered design
- A history developing designs from concept to manufacture
