Mobile Quality Assurance Engineer | London

At Cambridge Audio, we want you to hear your music at it's very best, as the artist intended it to be heard, with nothing added, nothing taken away. That's what we've always wanted because that's what music lovers like us deserve. It's why we we're constantly experimenting, solving problems and creating new kit. It's why we've been doing what we do for the last 50+ years. It's why we're always trying to make the listening experience better. Pure. However you listen, whatever your budget, our goal is simple: Give you the best possible sound, at the fairest possible price.

Our engineering department encompasses many disciplines; industrial design, electronics, embedded software and mobile application development are all carried out by dedicated team of music lovers on a mission to produce audio equipment that faithfully creates a pure and natural sound. Nothing added, nothing taken away.

We're looking for a Mobile QA Engineer to join our Engineering team.

We're a business full of great people who are encouraged to develop their careers and push their own creativity and progression. To find out more about us, visit: www.cambridgeaudio.com/about-us

Job Description
As part of a rapidly changing technological environment our products are constantly evolving; our user experience is now more important than ever and to ensure we continue to deliver class leading products we're investing in a team dedicated to progressing the user interfaces of our products.

Working in an agile scrum team you'll be responsible for working with designers, and mobile and embedded software developers to make sure our apps and product interfaces meet the high standards expected by our customers.

You will be an advocate for quality and the voice of the end user, participating in design reviews and discussions relating to proposed features and the overall app experience.

Key Responsibilities
Ensure the high quality of our mobile applications through testing and collaboration
Define and perform acceptance, functional and integration tests
Participate as an integral member of our agile team to ensure stories contain relevant and useful acceptance criteria

Develop and manage complete and efficient test cases during sprints in order to verify acceptance criteria has been met

Track test cases, bugs and stories to ensure we maintain a full history of our workflow

Skills

Strong and demonstrable passion for teamwork

Ability to develop new skills quickly and adapt to working with new products and processes

Experience of quality assurance processes, test planning, execution and reporting

Understanding of Agile/Scrum working practices

Experience testing in iOS and Android mobile environments including a good, working knowledge of Apple and Google UX guidelines

Good verbal and written skills and an ability to communicate at all levels

Experience | Tools

Agile/Scrum working practices and
